

hello my name is george c mullins my amateur call sign is KC8QWW and i pass my general written test but i can not pass the morse code test because when i try to listen to the code letters and try to think what the letters are i can not write them down on paper at the same time i cant think that fast because i am very slow to learn things i only when to the 6grade in school they are a lot of people in world like me that have a learing disability that stop them from learing the morse code letters for hf bands just because a ham operator that can copy morse code does not make him a good ham operator what makes good ham operator is he has to obey all fcc rules and be polite and courtesy to all ham operator where they are technician technician-plus but some of the ham operator that has there hf privileges they dont think that people that dont know morse code are not ham operator even when they got a ham license they think they are better ham operator because they know morse code that does not make them a better ham operator then us what does morse code have to do with makeing good ham operator all it show that they are lot smarter then us techician are i have listen to the hf frequency and heard people useing foul words and meow like a cat bark like a dog wistle on the bands things like this is not a good ham operator to be a good ham operator obey all fcc rules and be polite and courtesy to all this is a good ham operator and i hope and pray that the fcc would pass the NEVEC PETITION RM-10870 and the PETION RM-10787 the FCC should give all the technician a chance to make good ham operators on the hf bands most all the countrys are dropping the morse code requirements for hf frequency is united states going to be the only country to hold back technicians from geting on the hf bands i would think that the fcc would want to get more people into the ham radios frequency you the fcc can do this by dropping all morse code requirements for all ham exams i hope the fcc grant this petition thank you.
